“In Q1 2017, we continued to deliver strong results in our professional business. In the quarter, we launched Jabra Speak 710, which further strengthened our leadership in the category of premium, portable speakerphones for conference calls and music. I am again very pleased to see our dedicated focus on developing innovative products and on ensuring best-in-class commercialization translating into a strong momentum that will allow us to continue to gain market shares.”

René Svendsen-Tune

EVOLVE 75e UC USB/BT & Link 370 NA/APAC: \$259 EMEA: €239

Engineered to be the future of professional UC-certified wireless earbuds

EARBUDS

Familiar wearing style

Super comfortable behind-the-neck wearing style with stereo earbuds for all-day wearing with intuitive call control and vibrating call-alert integrated in the solution.

MICROPHONE

Unique microphone concept

Innovative microphone concept with superior professional call quality powers UC-certification – including Jabra HD audio quality and stereo-grade speakers.

CONCENTRATION

Premium concentration zone

ANC to cancel out unwanted noise and Busy Light to signal “not to be disturbed”. Oval shaped ear gels and ear wings in multiple sizes for improved Passive Noise Cancellation and comfortable fit.

FLEXIBILITY

Superior battery-life

All day office-use powered by innovative battery solution to provide up to 12h use. Designed to intelligently activate “power nap mode” when magnets in earbuds connect.

CONNECTIVITY

Dual connectivity

Always connected to two mobile BlueTooth devices with a wireless range of up to 10m for smartphone and 30m for PC powered by Jabra Link 370.

ADOPTION

Faster UC ROI

Made to power headset adoption for the most internal mobile people powered by a highly mobile wearing style in a familiar design that includes Skype for business certification.

MOBILITY

High mobility

Portable form factor with pouch - 15-h talk time – 30m long wireless range

CONFERENCING

Conference room coverage 1-4p

Individual or shared solution

Measure, visualize and analyze the noise level in the office

Visual feedback of noise level

Instant feedback technology indicates a green, yellow or red ear, when conversations are above a set limit

Measure noise trends

Noise trend technology indicates the average noise level measured over time – typically 15 min.

Customized sensitivity levels

Adjust the sensitivity level to fit the specific office environment you're working in

Quantify noise problems

Transfer the data from the Jabra Noise Guide to a PC and use the embedded software to get an analysis and quantification of the noise problems.

Flexible placement

A portable device for flexible placement in different locations around the office

Jabra Handset 450

AVAILABLE

EMEA: € 129 / £119
NA: \$ 129
